Education

Vellore Institute of Technology (VIT)

2023 – 2027

B.Tech in Computer Science and Engineering — CGPA: 9.27 / 10

Vellore, Tamil Nadu

Experience

Marwadi Shares and Finance Limited (MSFL)

May 2025 – Jun 2025

Flutter App Developer Intern

Rajkot, Gujarat

- Built a real-time chat application using **Flutter** and **.NET SignalR** with group chats, read receipts, and online presence, supporting **100+ concurrent users** while reducing message response latency by **40%**.
- Implemented reliable **SignalR connection management** with automatic reconnection and long-polling fallback, optimizing API communication for stable and scalable real-time messaging.
- Built a **file management system** supporting uploads up to **5 GB**, download management, and local storage.

Centre for Social Entrepreneurship and Development, VIT

Apr 2024 – Feb 2025

Core Committee Member

Vellore, Tamil Nadu

- Organized a **national-level hackathon** with **200+ participants**, coordinating event logistics, sponsor engagement, and cross-functional teams while increasing event reach by **60%**.
- Collaborated with student clubs, faculty, and external partners to organize technical and entrepreneurship-focused events.

Projects

Strategic News Analyzer – Geopolitical Intelligence Dashboard | FastAPI, React, PyTorch, RoBERTa

GitHub

- Built a **FastAPI-React** geopolitical intelligence platform that aggregates real-time news from **3 APIs** across **8+ languages**, providing interactive dashboards, live risk monitoring, and AI-assisted analysis.
- Developed AI services for **sentiment analysis, credibility scoring, media bias detection, entity extraction, and semantic search** using **RoBERTa** and **ChromaDB**, achieving sub-**15 ms** semantic retrieval latency.
- Implemented an asynchronous ingestion pipeline that processed multilingual news articles, generated vector embeddings, and built knowledge graph relationships, analyzing **10 articles** end-to-end in **15 s**.

Query Weaver – Text-to-SQL Platform | FastAPI, React, ChromaDB, Groq, MySQL

GitHub

- Built an **LLM-powered Text-to-SQL platform** using **FastAPI**, enabling schema retrieval, SQL generation, conversational memory, and query execution with an average end-to-end latency of **0.7 s**.
- Designed a retrieval architecture using **ChromaDB** and **MySQL**, achieving **44 ms** vector-based schema retrieval and **2–3 ms** SQL execution with automatic schema synchronization after DDL operations.
- Built a full-stack application using **React**, **FastAPI**, and **Docker**, supporting persistent chat history, interactive SQL visualization, and secure natural language querying over relational databases.

Aneri Enterprise – Company Product & Driver Platform | React, Vite, Supabase, PostgreSQL

Live

- Designed, developed, and deployed the production web platform for **Aneri Enterprise**, serving **500+ users** with product catalogs, driver resources, and content management workflows.
- Engineered a backend using **Supabase (PostgreSQL)** with relational database design, secure file storage, efficient data retrieval, and real-time analytics for user engagement and product interaction tracking.

Technical Skills

Languages: Python, C++, Java, JavaScript, SQL

Core CS Fundamentals: Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks

Backend & APIs: FastAPI, Flask, .NET Web API, RESTful APIs, Server-Sent Events (SSE)

Frontend: React, Flutter, Tailwind CSS, HTML/CSS, Next.js, React Native

Databases: PostgreSQL, SQLite, ChromaDB, Supabase, Firebase

Machine Learning / AI: PyTorch, Hugging Face Transformers, Scikit-learn, Neural Networks, NLP, RAG

Tools & Cloud: Docker, Git, Linux, AWS EC2, S3, IAM, MLflow, Dropbox

Certifications

Complete Data Science, Machine Learning, Deep Learning & NLP Bootcamp

Oct 2025

Udemy

Oracle Cloud Infrastructure 2025 Certified Foundations Associate

Jan 2026

Oracle University
