Education

Vellore Institute of Technology (VIT)

B.Tech in Computer Science and Engineering — CGPA: 9.25 / 10

2023 – 2027

Vellore, Tamil Nadu

Experience

Marwadi Shares and Finance Limited (MSFL)

May 2025 – Jun 2025

Flutter App Developer Intern

Rajkot, Gujarat

- Built and deployed a **real-time chat system** using Flutter and .NET SignalR, supporting **100+ users** with **40% lower latency**.
- Implemented **file sharing, message tracking, and group chat** for internal collaboration.
- Optimized **API interactions and data flow** to improve throughput under concurrent usage.
- Collaborated with backend teams to design **scalable real-time communication workflows**.

Centre for Social Entrepreneurship and Development, VIT

Apr 2024 – Feb 2025

Core Committee Member

Vellore, Tamil Nadu

- Organized a **national-level hackathon** with **200+ participants**, managing logistics and sponsorships.
- Coordinated **cross-functional teams** to execute technology-driven initiatives.
- Increased event reach by **60%** through targeted digital campaigns and strategic engagement across multiple platforms.

Projects

QueryWeaver – Full-Stack Text-to-SQL System | FastAPI, React, SQLite, ChromaDB, LLM Integration

- Built a **full-stack Text-to-SQL system** enabling query generation, execution, and visualization from natural language.
- Designed backend integrating **LLM-based SQL generation, schema retrieval (ChromaDB), and execution** using FastAPI.
- Implemented **REST APIs and SSE** for real-time schema updates and communication.
- Developed a **React UI** with chat interface, schema explorer, and data visualization.

MediForgeLLM – Medical Query System | Python, PyTorch, FastAPI, Transformers

- Built a **medical query processing system** using transformer-based models to generate structured, domain-specific responses.
- Designed and deployed **FastAPI-based REST endpoints** for low-latency inference and scalable request handling.
- Implemented a modular **training, evaluation, and inference pipeline** to support reproducibility and maintainability.
- Optimized model inference workflow to handle **multiple concurrent requests** efficiently.

EcoMind – Waste Classification System | Flutter, Firebase, Python, Flask

- Developed a **full-stack waste classification system** integrating a mobile frontend with backend APIs for real-time predictions.
- Integrated Firebase for **data storage, user interaction, and real-time updates** across application components.
- Reduced waste sorting time by **60%** through automation and intelligent classification of waste categories.

Technical Skills

Languages: Python, C++, Java, JavaScript

Backend & APIs: FastAPI, Flask, .NET Web API, RESTful APIs, API Design, Concurrent Request Handling

Frontend: ReactJS, Flutter, HTML, CSS, TailwindCSS

Databases: SQLite, Firebase

Tools & DevOps: Docker, Git, GitHub, Linux, AWS, MLflow

Core CS Fundamentals: Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks

Certifications

Complete Data Science, Machine Learning, Deep Learning & NLP Bootcamp

Oct 2025

Udemy

Artificial Intelligence A–Z 2026: Agentic AI, Generative AI & Reinforcement Learning

Jan 2026

Udemy

Oracle Cloud Infrastructure 2025 Certified Foundations Associate

Jan 2026

Oracle University
